

2. 解析字节流演示

```
Sub Main()  
    ' 数据包大小  
    Dim byteMessageSize As Byte() = New Byte(3) {&H24, &H4, &H0, &H0}  
    Dim intMessageSize As Integer = BitConverter.ToInt32(byteMessageSize, 0)  
    Console.WriteLine(intMessageSize)  
    ' 控制器通电时间  
    Dim byteTime As Byte() = New Byte(7) {&HDB, &HF9, &H7E, &H6A, &HBC, &H54, &H76,  
                                             H40}  
    Dim doubleTime As Double = BitConverter.ToDouble(byteTime, 0)  
    Console.WriteLine(doubleTime)
```

因此要解析整个字节流数据包，请参考《Client Interface》数据表。
